UC INTERNATIONAL SUMMER SCHOOL

JULY 3-16, 2022

Participants will select 1 program track from the following:

TRACK 1: Blockchain Technology

The introduction of bitcoin sparked a revolution towards a decentralized, digital economy. One of the fundamental elements of cryptocurrencies like bitcoin is the blockchain - an immutable, digital ledger of transactions that records not only financial transactions, but anything of value.

We will discuss digital currencies, digital asset valuation, decentralized finance applications, and non-fungible tokens (NFTs). We will also explore distributed data structures and computing architecture and present a framework to analyze smart contract capabilities and platforms. We will also analyze the future direction, opportunities, risks and challenges of blockchain technology.

TRACK 2: Technology Entrepreneurship Bootcamp

The greater Cincinnati area is on the forefront of becoming a global economic leader around the areas of supply chain, logistics and sustainability.

We will introduce you to these sectors, introduce to you the regional business leaders making it happen and challenge you to identify and create your own venture.

Using robotics as the foundation of your venture technology, participants will create a business model and pitch their concept in front of regional leaders for feedback.

Cost: $2300

includes on-campus housing, campus meal plan (3 meals per day), academic instruction, cultural activities, company visits, and certificate of completion.

Cultural activities may include:
Cincinnati Reds baseball game, downtown city tour, viewing Independence Day fireworks, welcome and farewell dinner.

Additional out of pocket expenses:
International airfare, $350 SEVIS fee, $180 US visa fee, international health insurance.

Application Deadline: **Jan. 25, 2022**
